The Concept

Virgo is a decentralized token created by the Virgo team using white cryptography and blockchain. Having backed by The Virgo community business governance entity we aim to deliver the Virgo coin, a global currency system for all financial services.

Virgo is under development of a multi-function blockchain system called Virgo-blockchain, an open-source blockchain platform to build and execute different products like cryptocurrency (virgo coin).

2019 Q4 is an upfront timeline to start distribution of Virgo tokens, out of 30 million initial supply token, **10 million VIRGO token are reserved for reward distribution**, rewards like bounty, referral program, jarvis trading, transfer etc...

Creating the Virgo Coin

Although a goal is set to launch a global currency system that can be used everywhere and for everything, Virgo team's first mission is to successfully produce the multi-function blockchain to mine and generate Virgo coins.

Virgo coin will have the same impact as any other cryptocurrency in the market, continuing with the same supply volume there will be a complete decentralized currency system with a huge market cap volume.

Get Started with Virgo token

Virgo tokens are exclusively distributed and traded on the VG-wallet, a secure mobile app wallet. The app is set to perform all the vro trade operations along with reward programs like referral and jarvis trading. You can purchase unlimited number of VRO tokens for BTC, hereby the initial token price is set to 0.10 USD/VRO.

Heading towards a big future, virgo token has set a price processing mechanism called "**upcap stability**". This is a process wherein the min and max price limit for trading is set, traders cannot trade the token beyond this limit. Hence giving an equivalent stability to token.

Promising a risk free, reliable and beneficial token platform for crypto experts and starters.

After the successful development of Virgo coin by mining into own Virgo-blockchain, under the **main net program** the token will be claimed back by Virgo team and Virgo coins will be provided to token holders in return.
